## CAMARO/FIREBIRD

Camaros and Firebirds have long been very popular with racers, restorers, and collectors. Their long hoods and short trunks add up to sporty, macho styling that just about everyone seems to like. But for many years it was difficult to find affordable sheet metal and other parts for restoration or repair. Today your friends at Goodmark Industries are proud to offer a wide assortment of premium quality reproduction parts for the famous F-body twins. Look through the catalog to find the parts you need, or visit online, or just give our expert sales staff a call!

### BUMPERS AND GRILLE

Our bumpers are new, die-stamped, high quality steel, triple plated, and excellent fit. The plating process of copper / nickel / chrome meets original factory standards. Get a set of these quality bumpers for your car, and restore that shine your car's been lacking. Order a Bumper Bolt Kit and a Bumper Bracket Set for complete replacement. **We also rechrome original bumpers...call us for prices and lead time. Send us your original core, and we will show plate it and pay the return shipping.**

#### Chrome Bumpers

New high quality chrome bumpers will replace rusty or damaged originals. Be sure to order bolt kits and bracket sets for complete replacement where available.

## GRILLES AND FRONT LAMPS

We all know that a flawed grille can spoil the looks of any car. A segment that is missing, moldings that are missing, a crack, or blemish will mess up the "detailed" look of the whole front end. Get a brand new Goodmark® grille and show the world a "new face" on your car. These quality grilles are made from molded plastic just like the originals, and moldings are included with all kits. Looking good!

### Grilles

All Grille Kits include grille, upper and lower molding, headlamp bezels, and all mounting hardware for simple installation and complete correct replacement.

## A Word About Tooling...

The act of stamping flat sheets of steel into the complex shapes that make up fenders, doors, hoods, bumpers, and other parts generates tremendous pressure, heat, and friction.

The stress and strain of repeatedly stamping various shapes and distortions inevitably causes rapid wear to tooling surfaces. As the tooling wears out, the shapes it forms out of sheets of steel must also change. Thus, tool-life is a very big factor in the quality of parts you receive for your vintage car or truck.

Keeping this in mind, it just makes sense that brand new precision tooling can sometimes produce higher quality parts than old tooling, which has been used for many years to stamp tens of thousands of parts.

When the metal masters at Goodmark Industries encounter old tooling, they must weigh the practicality of restoring and resurrecting old dies and tools, versus the cost and time necessary to start over from scratch. But more importantly they must decide which method will result in better quality new products at affordable prices.

Goodmark® team members know that you want fenders, doors, quarter panels, and other sheet metal items that fit right, and look exactly like the originals. They also know that you aren't made of money, and that you need these parts to be affordable. Today's modern machining techniques and materials are vastly improved over those used nearly 40 years ago, when many of these parts were first made at the factory. Thus, when deciding whether to resurrect old tooling or make brand new dies, the decision often leans toward brand new tooling. Either way, Goodmark Industries prides itself in offering the finest available reproduction sheet metal parts on the planet, and providing these precision quality parts at reasonable prices.

## Steel Hoods

Hoods are wide and generally pretty flat in shape, which causes every little flaw to show through a paint job like a sore thumb. Make your hood look beautiful, and you've got a good head start on a great looking car. Goodmark's precision quality brand new hoods will look terrific on your car, and probably cost you a lot less than the bodywork and materials to restore that old rusty dented original. Go for it, and put a gorgeous new steel hood on your car today! All hoods are shipped via Truck Freight and will incur a \$20.00 hood pallet charge.

## Hoods, Cowl Induction Style

For a smooth and practical style that allows more under-hood room for tall intakes or carb spacers, get one of these Steel Cowl Induction hoods. Goodmark® has the largest selection of Cowl Induction style hoods available today. These hoods are complete with stamped-steel under-hood bracing and outer skin, which looks as though they were stamped in an OEM factory. And, they bolt right on using stock hardware and hinges. What could be easier? The Cowl Induction hoods feature a functional 16" diameter air plenum to move air to the air cleaner. All hoods are shipped Truck Freight and will incur a \$20.00 pallet charge.

## ENGINE COMPARTMENT & UNDERHOOD DETAIL

Get the details right, and your engine compartment will be a rare treat for everyone to see at the next car show or cruise-in you attend. Enhance the appearance of the engine and the whole engine bay with correct clips, bolts, screws, straps, brackets, grommets, etc. And what is right at top-dead-center for everyone to see? The air cleaner, of course. Nothing looks better than the original style unit. Today, even many owners of street machines are modifying our stock air cleaners to fit their aftermarket carburetors and fuel injection, for that "period correct" look.

## DOORS AND HARDWARE

## Door Shells

The most abused part of any car has to be the doors. Bicycles, grocery carts, and parking lots all seem to have been created for the purpose of damaging car doors. Add to that all the rain that slides down the side glass into the bottom of the door frame, and your doors face a pretty rough life. Now you can get all new complete door assemblies, door skins, hinges and inside / outside hardware. These precision parts allow you to easily repair or replace your door as needed. All Door Shells ship via Truck Freight.

## What's that black coating on most Goodmark® sheetmetal?

It's called **EDP**, which stands for **E**lectro **D**eposit **P**rimer, and it makes an excellent primer under your paint job.

As you probably know, factory paint back in the '60's and '70's was usually just sprayed onto the surfaces that could be reached by a spray gun. But this left many blind areas behind braces, etc, completely bare of any paint protection. Hence, many cars rusted within a few years. But EDP coating is applied electrically, almost like a plating process. The excellent rust-resistant coating reaches every nook and cranny, for unparalleled corrosion resistance.

The only surface preparation required is a light scuffing of the surface for better paint adhesion. No stripping is necessary. The panel is protected from rust as long as the EDP coating remains under your paint.

This is one more way that Goodmark® goes the extra mile for our customers!

## Which type of "Quarter Panel" do you need?

A "Full Quarter Panel" is made just like the panels which were welded onto your car when it was new. Indeed, for this reason some people call them "Factory-Style" or "OEM-Style" Quarter Panels. These panels reach all the way to each edge of the rear quarter panel area, including the trunk and door jambs, and reach to the roof line, just like the factory-original panels did for your particular model.

"Quarter Skins" are nearly as large as "Full Quarter Panels", but do not include any trunk lips, door jambs, etc. They reach out to each edge of the quarter panel area, but you must leave the edge of original quarter panels to weld to. "Quarter Skins" reach upward to approximately the location where the bottom of original vinyl roofs would normally be. Keep in mind that, while "Quarter Skins" initially cost less than "Full Quarter Panels", it often takes more labor to install them. So, if keeping your costs down is the only reason that you might select "Quarter Skins" over "Full Quarter Panels", you should be aware that the final net cost might not represent much of a savings. Also, "Quarter Skins" do require a lip to weld to, all the way around the edge. This makes them a poor choice for badly rusted-out cars...since there is often no bottom edge remaining to weld to. In this case, you are better off choosing "Full Quarter Panels", and adding Outer Wheelhouses to completely replace the rust.

"Quarter Patches" are just what they sound like...small pieces of quarter panels, for repairing small holes in isolated areas. These are good choices for nearly perfect cars with tiny holes in specific spots, or for low-budget "driver" cars. But it can be very difficult to hide the seam areas where the patches are welded to the original panels.

## Quarter Side Skins

EDP coated panels repair major rust on the side of the quarter panel. These are not full panels, but cover from the bottom of the quarter up to the belt line. They lip into the door jamb, but do not include the pillar. They also roll over the top about 1/2" to give you a welding lip, but do not extend to the trunk opening, nor do they wrap around the tail panel. They only cover the SIDE of the quarter. Primarily used for rust repair in the wheel opening and lower half of the quarter, and where full quarters aren't available. All Quarter Panel Skins are shipped via Truck Freight.

## Gas Tanks

Replace the rusty and muck-filled old gas tank in your muscle car with brand new high quality steel Gas Tanks from Goodmark®. There is no cost-efficient way to restore the outside appearance of a gas tank, and the rust particles, sludge, and stale gas residue inside are just carburetor problems waiting to happen. While you're at it, be sure to replace rusted or weakened old straps, brackets, bolts, and gas caps. Most tanks are also available set up for EFI, and include the fuel pump and sending unit.

## Gas Tank Sending Units

Always use a new sending unit when replacing a gas tank. This will ensure a good flow of fuel instead of a crudded rusted original gumming up your new tank.

## Don't even THINK...

...of replacing quarter panels while leaving old rusted outer wheelhouses in place. Many people have made this mistake over the years, and end up having to do their car over again. The original Outer Wheelhouse is welded onto the quarter panel at the factory, and the seam forms a natural place to trap moisture and debris. Whenever you see a car with rust around the wheel well opening, you know that BOTH the quarter panel and the Outer Wheelhouse are badly rusted. While the wheelhouse is indeed hidden behind the quarter panel, it is the foundation that your new quarter panel must be welded to. So, rusted and weakened steel may not hold your quarter panel properly. Moreover, you may soon have to resort to repairing rust holes again... this time in the wheelhouse. And where is the first place prospective buyers will probe their fingers into while searching for evidence of rust repair? Under the wheel well opening, of course!

## BODY HARDWARE

The lowly bolts, screws, clips, springs, retainers, and other hardware items are often overlooked—until you're trying hard to reassemble your finished Camaro / Firebird and get it ready to drive out of the garage. But you'll hate to put rusty or mismatched hardware on that beautiful newly painted vehicle. And those "shade-tree" fixes like baling wire and universal hardware can look kind of tacky. And then, where can you find the authentic hardware at the last minute? Get a head start on the completion of a highly detailed project, by ordering the correct hardware for your vehicle today. Give Goodmark® a call today!

### Master Body Hardware Kits

Most of the hardware you need to properly assemble your body is included in these comprehensive concours quality kits. See our website Online Catalog for a complete list of each kit's components. Typical kits include fasteners to attach: Back-Up Lamps, Battery Tray, Bumpers and Brackets and Guards, Bumper Filler Panel, Cowl Panel, Door Latches, Fenders and Braces and Extensions and Splash Shields, Grille and Brackets and Moldings, Headlamp Bezels, Housings, and Adjusters, Header Panel, Hood and Hinges, Hood Levelers, Hood Catch and Lock Plate, Hood Catch Support, Hood Moldings, License Plate Brackets, Marker Lamps, Nameplates, Parking Lamps, Tail Lamps, Trunk Latch and Striker, Trunk Lid, Valance, Wheelhouses and Brackets.
