FULL SIZE CHEVROLET / PONTIAC

Full-Size muscle was always available before and after the intermediate cars came to fruition. A little known fact is that full-size models offer great weight transfer off the line, due to added weight over the rear axle. Smart drag racers used this fact to their advantage, and also the fact that the biggest engines were always available, where they might not be in an intermediate sized car. Goodmark offers a selection of sheetmetal for full-size models to keep your big car with your big motor happily cruising!

BUMPERS AND GRILLES

These Premium Quality Bumpers are new, die-stamped, high quality steel, triple plated, and fit perfectly. The show-quality plating process of copper/ nickel/ chrome meets original factory standards. Get a set of these excellent bumpers for your car, and show them off to the world. Be sure to order hardware and brackets where available for complete replacement of your factory original bumpers.

Chrome Bumpers

New chrome bumpers for popular models. These bumpers are designed to replace dull or corroded factory units. Premium bumpers are chromed in the USA for the ultimate in quality!

Hoods, OEM Style

Hoods are wide and generally pretty flat in shape, which causes every little flaw to show through a paint job like a sore thumb. Make your hood look beautiful, and you've got a good head start on a great looking car. These precision quality brand new hoods will look terrific on your car, and probably cost you a lot less than the bodywork and materials to restore that old rusty dented original. Go for it, and put a gorgeous new steel hood on your car today! Be sure to order new inserts or moldings if required. All hoods are shipped via Truck Freight.

Get new inner fenders!

With all the abuse that Inner Front Fenders have to take, it should be no surprise that they look so bad when you remove them from your car. The top areas usually look okay, up near the seam between the hood line and the outer fender. But it can be a real shocker when you disassemble the front sheet metal, and survey the rust and damage. Batteries leak acid on the Inner Front Fenders, while tires throw up rocks, water, snow, ice, salt, sand, and gravel at tremendous velocities. People often drill extra holes to mount accessories, and even Father Time seems to take a toll on those poor Inner Front Fenders. At Goodmark Industries we have learned to respect inner fenders, as we know how important they are to having proper fitting front sheet metal. And, they show up prominently every time you open your car's hood. Go ahead, order two new Inner Fenders. You'll love the way they look!

ENGINE COMPARTMENT DETAIL

Get the details right, and your engine compartment will be a rare treat for everyone to see at the next car show or cruise-in you attend. Enhance the appearance of the engine and the whole engine bay with correct clips, bolts, screws, straps, brackets, grommets, etc. And what is right at top-dead-center for everyone to see? The air cleaner, of course. Nothing looks better than the original style unit. Today, even many owners of street machines are modifying our stock air cleaners to fit their aftermarket carburetors and fuel injection, for that "period correct" look.

Quarter Skins

EDP coated steel skins are not full panels, but cover from the bottom of the side of the panel up to the beltline. They do not include the sail panel to the roof, the door jamb pillar, nor do they extend to the trunk opening. An excellent choice for repairing rust in the wheel arch or lower rear section. All quarter skins ship via Truck Freight.

Rear Wheelhouses

Heavy gauge steel panels used to form the wheelhouse over the rear wheel. The inner wheelhouse is the one you see inside the trunk. The outer wheelhouse mates up to the quarter panel in the wheel lip. If your quarters are rusty in the wheel opening, you need to replace these, too. These can be modified for convertible models by crushing down the top section to clear the top frame.

GAS TANKS

Replace rust and muck-filled old gas tanks in your muscle car, with brand new high quality steel Gas Tanks from Goodmark®. There is no cost-efficient way to restore the outside appearance of a gas tank, and the rust particles, sludge, and stale gas residue inside are just carburetor problems waiting to happen. While you're at it, be sure to replace rusted or weakened old straps, brackets, bolts, and gas caps. All Gas Tanks do not include filler neck unless noted. Some tanks are available set up for EFI and include the fuel pump and sending unit.

WEATHERSTRIPS

Detail your car and keep out weather and wind noise with our premium quality rubber Weatherstrips. These excellent reproductions of original parts will help your doors shut with that "new-car" solid sound, and they will keep windows from rattling and scraping against metal door parts. Get new Weatherstrips for your car from Goodmark!

Weatherstrip Kits

Brand new kits include almost all the weatherstrips you need to refurbish the car.

A Word About Tooling...

The act of stamping flat sheets of steel into the complex shapes that make up fenders, doors, hoods, bumpers, and other parts generates tremendous pressure, heat, and friction.

The stress and strain of repeatedly stamping various shapes and distortions inevitably causes rapid wear to tooling surfaces. As the tooling wears out, the shapes it forms out of sheets of steel must also change. Thus, tool-life is a very big factor in the quality of parts you receive for your vintage car or truck.

Keeping this in mind, it just makes sense that brand new precision tooling can sometimes produce higher quality parts than old tooling, which has been used for many years to stamp tens of thousands of parts.

When the metal masters at Goodmark Industries encounter old tooling, they must weigh the practicality of restoring and resurrecting old dies and tools, versus the cost and time necessary to start over from scratch. But more importantly they must decide which method will result in better quality new products at affordable prices.

Goodmark® team members know that you want fenders, doors, quarter panels, and other sheet metal items that fit right, and look exactly like the originals. They also know that you aren't made of money, and that you need these parts to be affordable. Today's modern machining techniques and materials are vastly improved over those used nearly 50 years ago, when many of these parts were first made at the factory. Thus, when deciding whether to resurrect old tooling or make brand new dies, the decision often leans toward brand new tooling. Either way, Goodmark Industries prides itself in offering the finest available reproduction sheet metal parts on the planet, and providing these precision quality parts at reasonable prices.
