Plymouth

DODGE & PLYMOUTH

High performance Dodges and Plymouths were a dominant force on the streets and at the heyday of the muscle car. Today restorers are almost fanatic in their love for the Pentastar and seventies. But for a long time it has been nearly impossible to find quality reproduction parts for restoration especially sheet metal body parts. But today the restoration specialists at Goodmark Industries are hard at work building top quality fenders, quarter panels, and more parts for your favorite Mopar muscle car. Check out the following pages to find the parts you need. And keep your eye on the Goodmark website, as we have new parts in development all the time. Read on!

BUMPERS AND GRILLE

Goodmark has new chrome steel bumpers and stainless steel hardware to mount your new bumper. Our Premium Quality bumpers are chromed in the USA and are excellent quality. Always use new hardware for that freshly restored look!

Chrome Bumpers

New chromed steel bumpers replace rusted or damaged originals. Our bumpers are triple nickle plated for durability and are great driver quality. Premium Quality bumpers are chromed in the USA and are excellent quality.

FRONT END SHEETMETAL

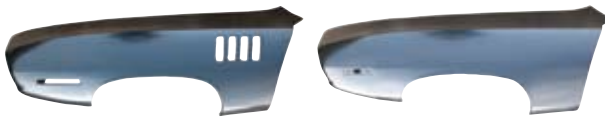

Front Fenders

New steel bolt-on assemblies feature the headlamp panel and all the braces as originals, not just the outer skins. We have spent a considerable amount of time and money to make these fenders from scratch and the result is a beautiful fender we would be proud to put on our own cars. These have not been available for several years, so get yours now that they're available!

Plymouth

Which type of "Quarter Panel" do you need?

A "Full Quarter Panel" is made just like the panels which were welded onto your car when it was new. These panels reach all the way to each edge of the rear quarter panel area, including the trunk and door edges, and reach to the roof line, just like the factory-original panels did for your particular model. For Dodges and Plymouths, the door jamb was never part of the original quarter panels.

"Quarter Skins" are nearly as large as "Full Quarter Panels", but do not include any trunk lips or sail panel. They cover only the side of the quarter panel, and reach upward to approximately the location where the bottom of original vinyl roofs would normally be. Keep in mind that, while "Quarter Skins" initially cost less than "Full Quarter Panels", it often takes more labor to install them. So, if keeping your costs down is the only reason that you might select "Quarter Skins" over "Full Quarter Panels", you should be aware that the final net cost might not represent much of a savings. Also, "Quarter Skins" do require a lip to weld to, all the way around the edge. This makes them a poor choice for badly rusted-out cars or collision damage...since there is often no bottom edge remaining to weld to. In this case, you are better off choosing "Full Quarter Panels", and adding Outer Wheel Houses to completely replace the rust.

"Quarter Patches" are just what they sound like...small pieces of quarter panels, for repairing small holes in isolated areas. These are good choices for nearly perfect cars with tiny holes in specific spots, or for low-budget "driver" cars. But it can be very difficult to hide the seam areas where the patches are welded to the original panels.

QUARTER PANELS

Full Quarter Panels

New EDP coated steel full factory style and coverage quarter panels for hardtop models. These are not the side skins but full factory coverage panels. Each panel is complete factory dimensions seam to seam. Be sure to order the trunk weather-strip gutters with your new panels as they are not included. Also be sure to order outer wheelhouses and trunk drop-offs if needed. All quarters are shipped truck freight.

Full Quarter Panels....Your BEST Choice!

If you have a car that is worth restoring, then it is probably worth restoring right! Our top-quality Full Quarter Panels are made just like the factory made them originally, with lap seams, and they reach up to the roof line. Unquestionably, these are the best choice for any quality restoration of a MOPAR body. Call today, or visit our website to place your order.

Dodge!

Quarter Panel Skins

New EDP coated steel panels cover the side of the quarter panel. They are not full panels, and do not include the sail panel, nor do they extend to the trunk opening, but go from the bottom up to the beltline and lip over the belt about 1". Be sure to order outer wheelhouses and drop-offs if required. All quarter skins are shipped truck freight.

Don't even THINK...

...of replacing quarter panels while leaving old rusted outer wheelhouses in place. Many people have made this mistake over the years, and end up having to do their car over again. The original outer wheelhouse is welded onto the quarter panel at the factory, and the seam forms a natural place to trap moisture and debris. Whenever you see a car with rust around the wheel well opening, you know that BOTH the quarter panel and the outer wheelhouse are badly rusted. While the wheelhouse is indeed hidden behind the quarter panel, it is the foundation that your new quarter panel must be welded to!

Deck Filler Panels

These are the steel panels that fill between the trunk lid and rear window. Usually rusted and repairs the rear window lower channel.

- 70-74 .. Challenger Coupe2120-710-701 \$186.95 ea
- 70-74 .. Barracuda Coupe.....2422-710-701 \$186.95 ea

Plymouth

Gas Tanks

Replace that rusty, muck-filled old gas tank in your Dodge or Plymouth, with brand new high quality reproduction steel Gas Tanks from Goodmark®. There is no cost-efficient way to properly restore the outside appearance of a gas tank, and the rust particles, sludge, and stale gas residue inside are just carburetor problems waiting to happen. While you're at it, be sure to replace rusted or weakened old straps, brackets, bolts, gas caps, and sending units. Go for it.

Gas Tank Straps

New tank straps used on popular models. Early models usually use one strap, while later models use a pair of straps.

What's that **black coating** on most Goodmark® sheetmetal?

It's called **EDP**, which stands for **E**lectro **D**eposit **P**rimer, and it makes an excellent primer under your paint job.

As you probably know, factory paint back in the '60's and '70's was usually just sprayed onto the surfaces that could be reached by a spray gun. But this left many blind areas behind braces, etc, completely bare of any paint protection. Hence, many cars rusted within a few years. But EDP coating is applied electrically, almost like a plating process. The excellent rust-resistant coating reaches every nook and cranny, for unparalleled corrosion resistance.

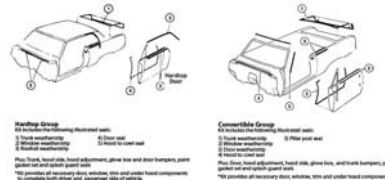

The only surface preparation required is a light scuffing of the surface for better paint adhesion. No stripping is necessary. The panel is protected from rust as long as the EDP coating remains under your paint.

This is one more way that Goodmark® goes the extra mile for our customers!

WEATHERSTRIPS
